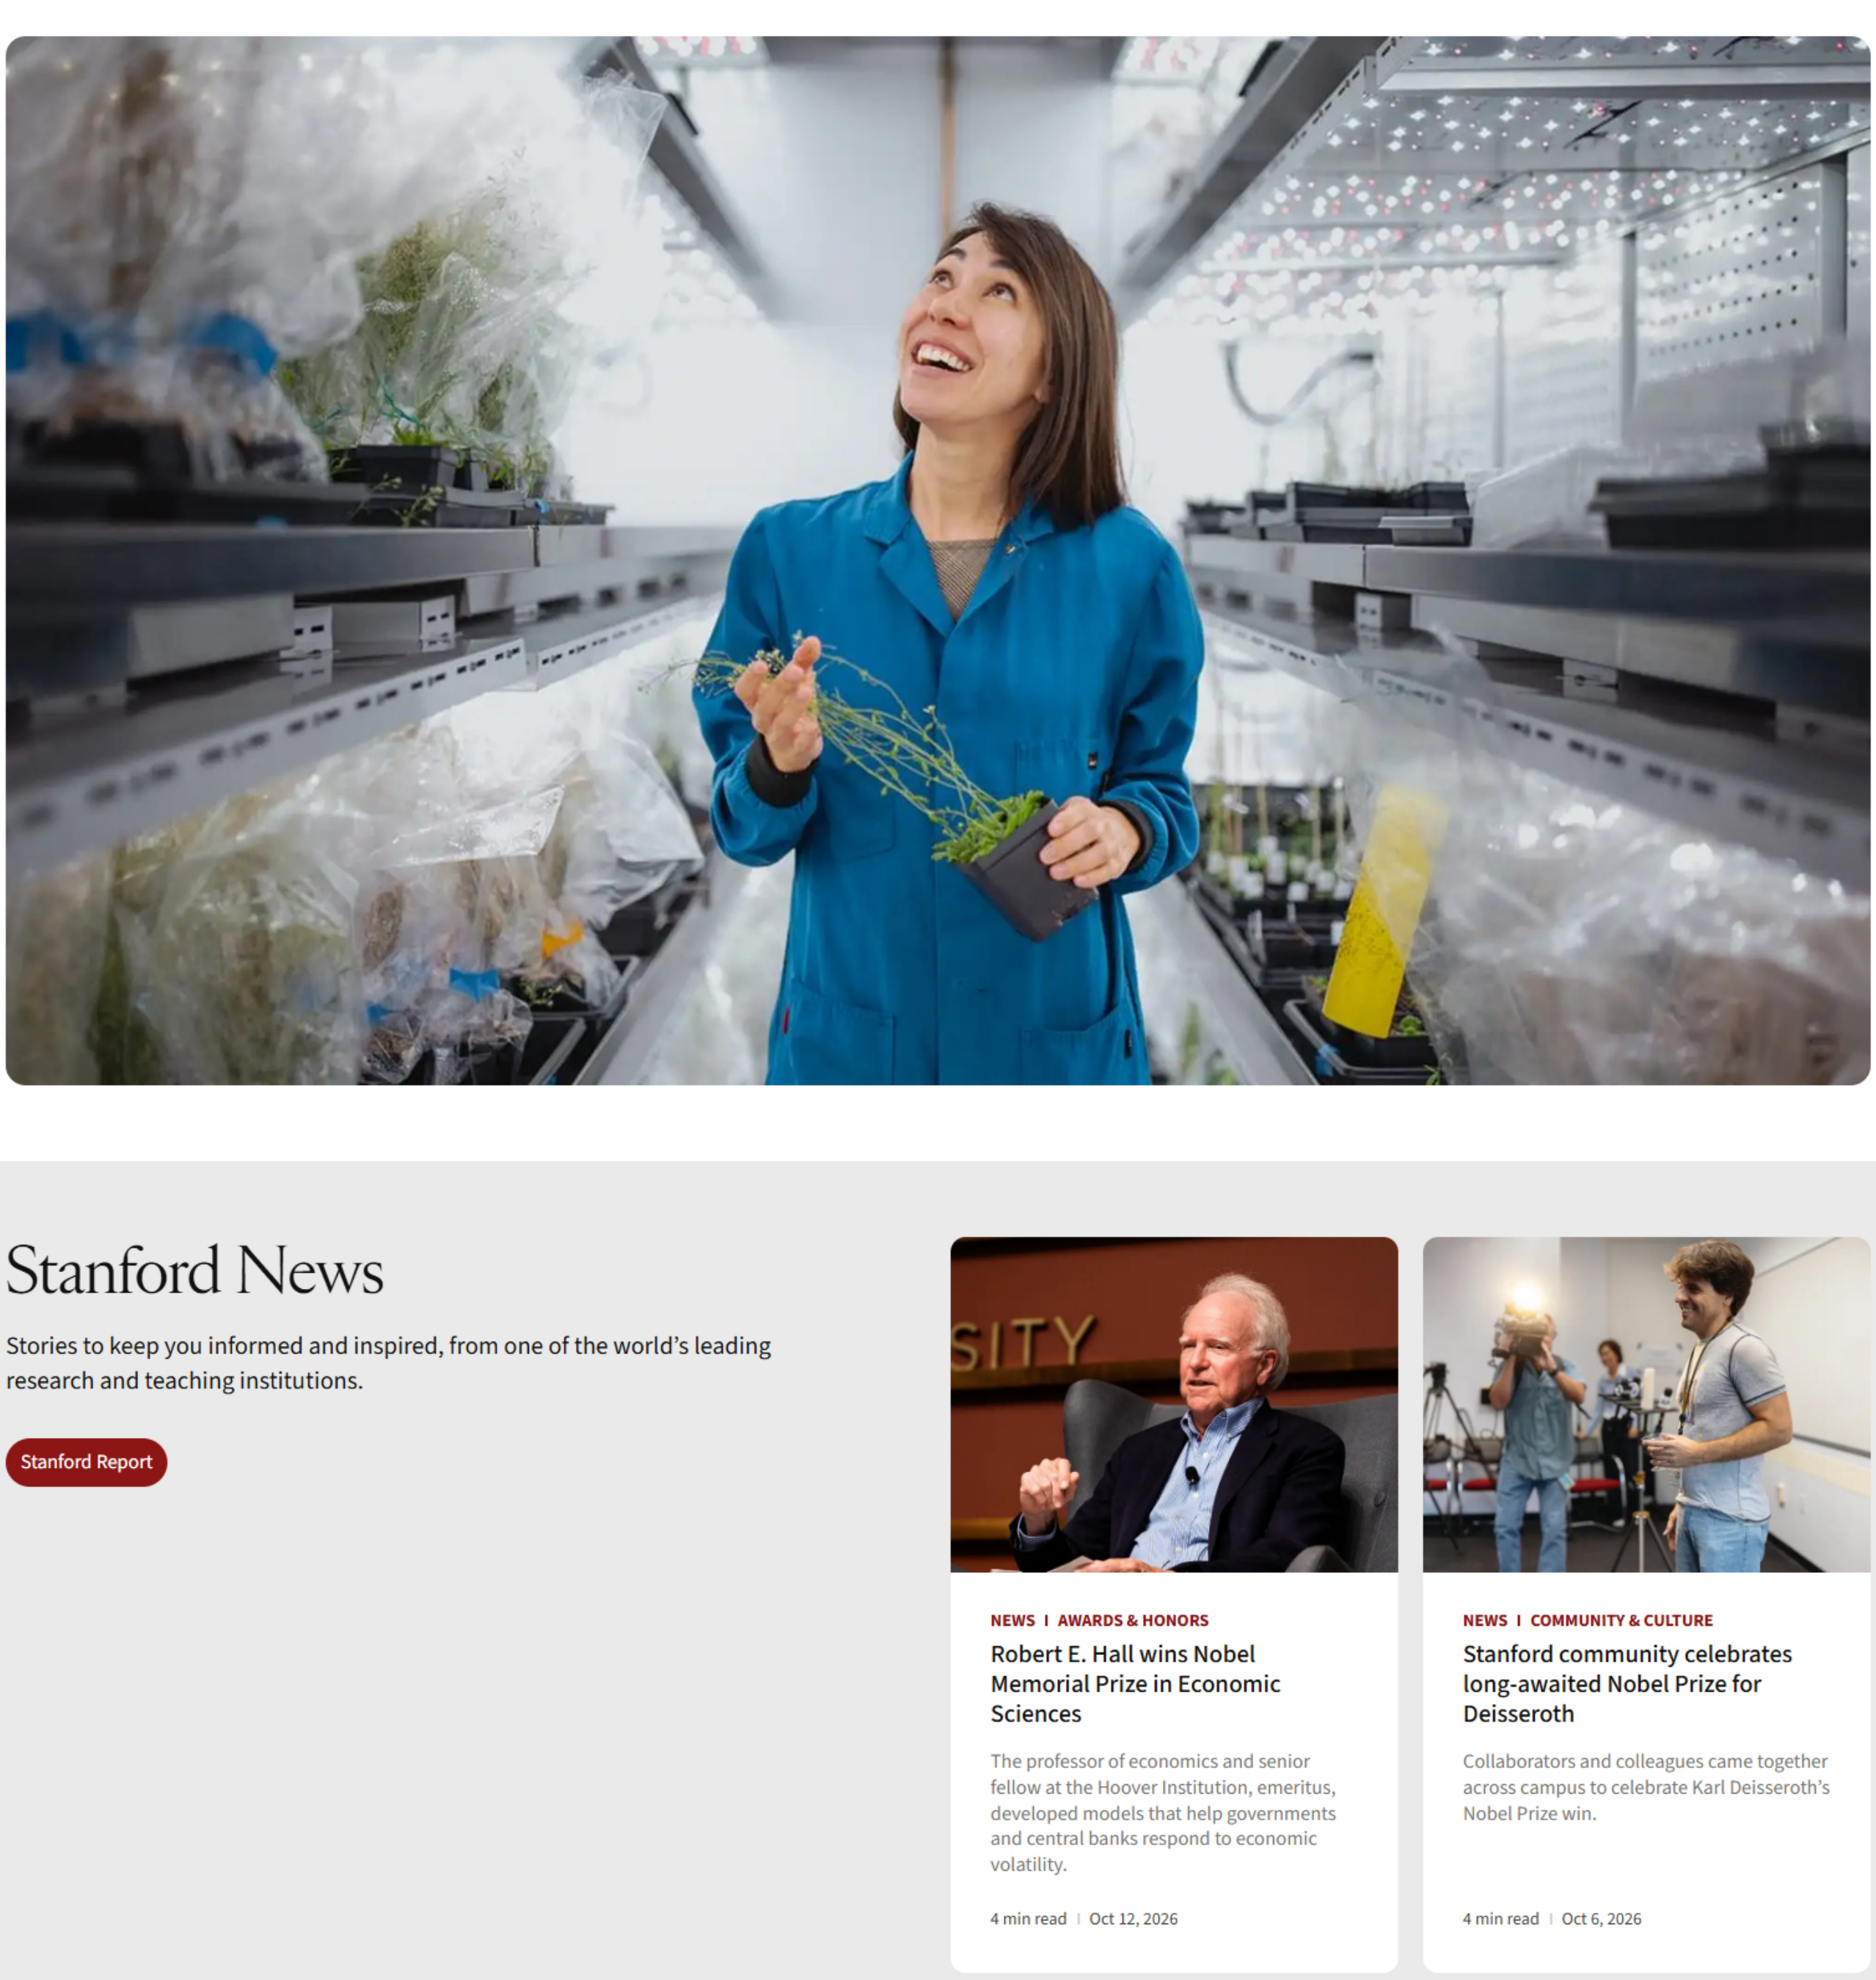
Nina Zhao is mapping the chemicals we encounter in daily life

Advancing the Frontier

At Stanford, a spirit of optimism and possibility energizes our mission of discovery and learning. Here you'll find a place of intellectual expansiveness, wide-ranging perspectives, and freedom to explore new lines of thinking. Alive with ideas and innovation, approaching questions with openness and curiosity, pursuing excellence in all we do – this is Stanford.

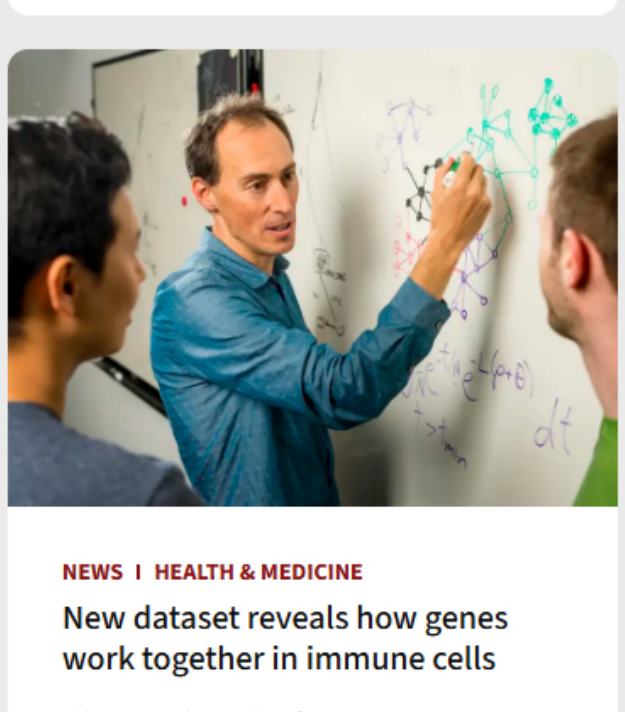
About Stanford



Stanford News

Stories to keep you informed and inspired, from one of the world's leading research and teaching institutions.

Stanford Report



NEWS I AWARDS & HONORS

Robert E. Hall wins Nobel Memorial Prize in Economic Sciences

The professor of economics and senior fellow at the Hoover Institution, emeritus, developed models that help governments and central banks respond to economic volatility.

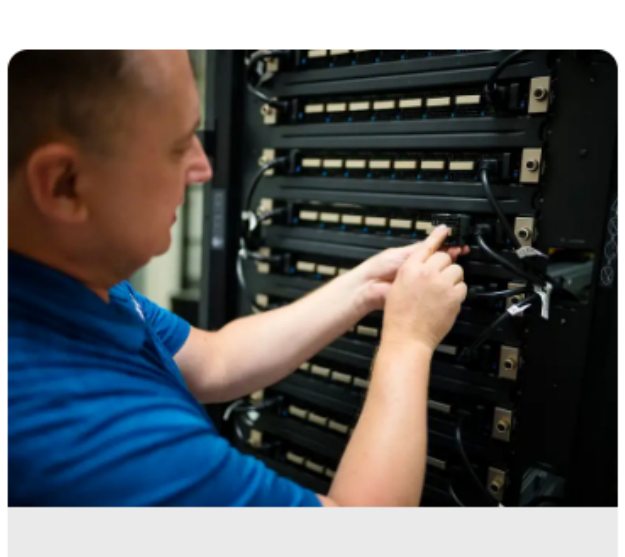
Achieving the promise of human-centered AI

Our impact

Computer science Professor John McCarthy, a "founding father" of AI, established the Stanford Artificial Intelligence Laboratory on campus in 1963. It was one of the first in the world to pursue the development of AI systems.

> *Today, the university continues to be at the technology's vanguard – supporting scientific inquiry, accelerating discoveries, building pathways for exciting new applications, and shaping policies that protect the public.*



Computing ecosystem allows faculty to aim high

Massive computing power at Stanford functions as a universal accelerant – compressing research timelines, enabling simulations that would otherwise be impossible, and opening entirely new categories of scientific inquiry.

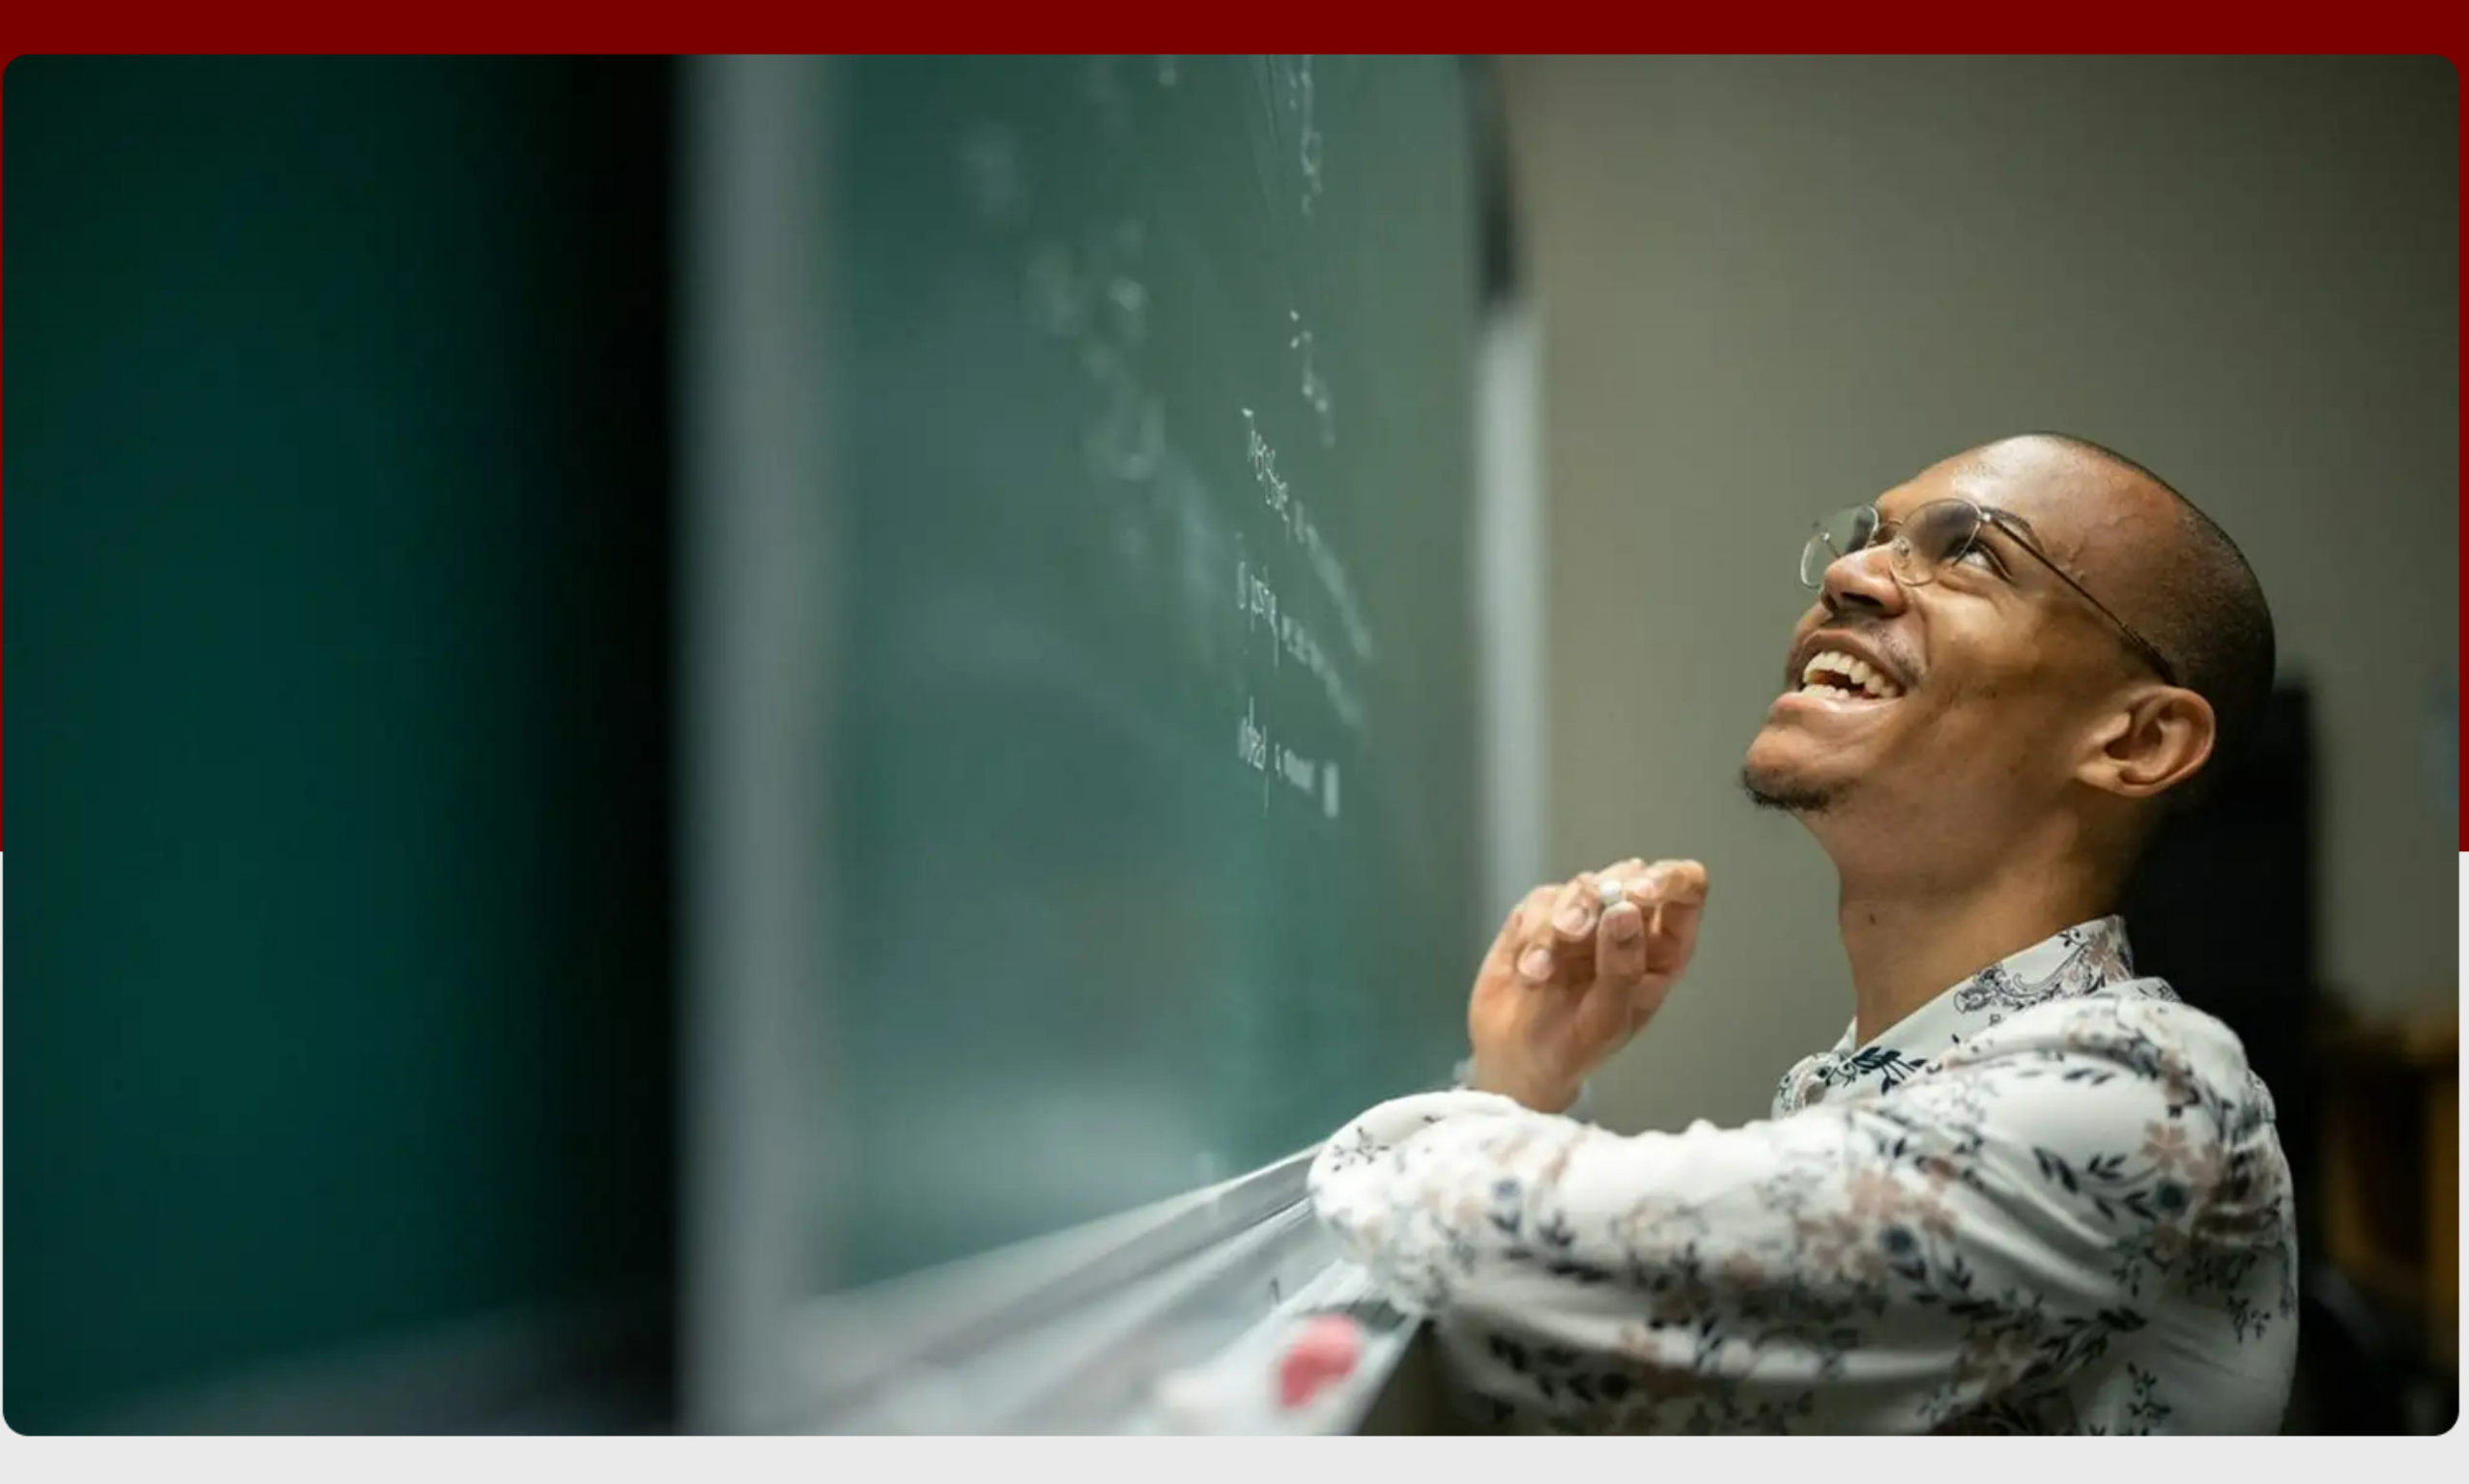
Education for Engaged Citizenship

Stanford prepares students to thrive and lead with principle in a complex society through open inquiry and vigorous debate.

Academics



Civic engagement on a lively campus

Ideas are born and tested in both quiet reflection and noisy debate. In classrooms, dorms, and third places on campus, Stanford students learn to listen with curiosity, embrace new perspectives, and engage differing views with rigor and respect.

Civics at Stanford

NEWS I COLLEGE

New undergraduate minor launches in civic thought and practice

Building on the first-year course COLLEGE 102: *Citizenship in the 21st Century*, the minor is open to students of all majors and encourages discussion of contentious issues facing democratic societies.
